## Mobile Application

We are continuing the Xamarin AsgardMobile transition, and have added resources to our desktop team to ensure other needs continue to be well-supported.

We will continue to provide project progress updates through our regular customer Project Management meetings.

We have made a change to the existing mobile application to save photos in a larger size, by customer request. When photos are saved on mobile, and later appear in reports or screens, they will display in equivalent resolution to photos added in the main application.

## Desktop Application

### Maintenance

#### Various Fixes / Changes

Small enhancements and fixes, in various areas of the system, arising from automated reporting of system performance and user experience. Affected areas include Stock Items, and Version Control.

#### New SMS Gateway

To support increased volume/usage of user-requested SMS work order notifications, we have transitioned to a new gateway (message delivery service). This transition is specifically intended to alleviate quotas imposed by Verizon, which resulted in some messages not being transmitted. There is no action required by end-users/IT.

## User Management

#### Permissions, Enhance PM Template Editing

By customer request, we have enhanced this permissions flag to only allow site-level users to add, edit, and remove flex tasks on templates attached to Organization Master Templates. The ability to edit site-level templates is unchanged.

## Cleans – New Module Underway!

Among the numerous and varied responsibilities of the “back of the house” Resort Operations teams, arguably the most critical is the daily turnover from Occupied/Dirty units to Clean/Available Inventory. This process goes by many names, such as “Breaking Out the House,” “House Breakout,” and “Daily Cleans”. It generally always includes stripping and re-stocking the units, repairing maintenance issues, and cleaning and inspecting for guest arrival.

We have identified an opportunity to replace the legacy, homegrown or purchased, manual or software-based Housekeeping “Cleans” systems/functionality that our customers use today, and to integrate existing work order and billing concepts in Asgard.

With this publish, we are introducing work behind-the-scenes.

You can learn more about our plans, and find distributable information, at <http://www.katanasoft.com/housekeeping-cleans-new-module-coming-soon/>

## Inventory Management

### Stock Items, UPC Search, Resolve Errors caused by Inactive Stock Items

We have resolved a reported issue with Fatal Errors caused by Inactive Stock Item UPCs.

### Stock Item Latency

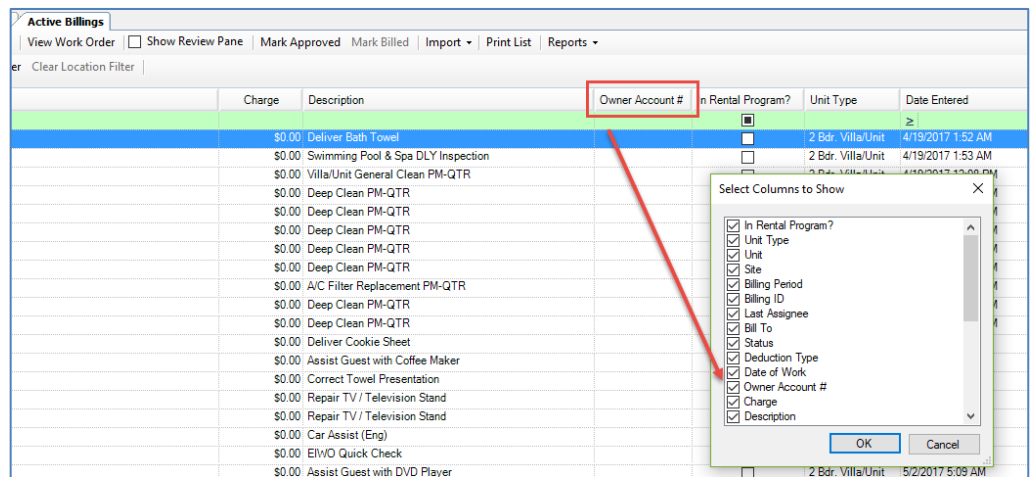

For customers with large stock item lists, we are addressing reported issues with latency adding new items and transferring items between stock rooms. The development on these items was completed this sprint, but will be introduced later in July, due to the need for extensive testing.

## Billings

### Add Owner Account Number to Active Billing and Billing Search Screens

By customer request, we have added the Owner Account information to these two critical Billing screens.

This field has been added to the default fields available on screen, but can be hidden by right-clicking on the grid and selecting Show/Hide columns.

The screenshot displays the 'Active Billings' interface. At the top, there are menu options: 'View Work Order', 'Show Review Pane', 'Mark Approved', 'Mark Billed', 'Import', 'Print List', and 'Reports'. Below this is a 'Clear Location Filter' button. The main area is a table with the following columns: 'Charge', 'Description', 'Owner Account #', 'In Rental Program?', 'Unit Type', and 'Date Entered'. The 'Owner Account #' column is highlighted with a red box, and a red arrow points to it from a 'Select Columns to Show' dialog box. The dialog box has a list of columns with checkboxes: 'In Rental Program?' (checked), 'Unit Type' (checked), 'Unit' (checked), 'Site' (checked), 'Billing Period' (checked), 'Billing ID' (checked), 'Last Assignee' (checked), 'Bill To' (checked), 'Status' (checked), 'Deduction Type' (checked), 'Date of Work' (checked), 'Owner Account #' (checked), 'Charge' (checked), and 'Description' (checked). The 'OK' and 'Cancel' buttons are at the bottom of the dialog box.

Charge	Description	Owner Account #	In Rental Program?	Unit Type	Date Entered
\$0.00	Deliver Bath Towel		<input type="checkbox"/>	2 Bdr. Villa/Unit	4/19/2017 1:52 AM
