Mobile Applications

AsgardMobile 1.0 – Current App

Maintenance – Various Fixes/Changes

Fix to reported issues with UPC Bar Code Scanner/Search functionality.

This version will require installation/update. Android version 2.1.24 and Apple version 2.1.24 are available in their respective stores.

AsgardMobile 2.0

Work Order Detail Screen

This publish, we completed the creation of a view-only Work Order Detail screen. It is a precursor to the dispatcher and assignee standard work order edit and complete workflows.

The new screen includes enhanced work order details, Comments/Photos, Costs, and complete Unit Notes. This screen is expected to go through several rounds of design refinements, before it is considered complete. Users who wish to participate in Beta testing should contact support for information – Beta testing is now available for both Apple and Android.

Desktop Application

Maintenance

Various Fixes / Changes

Small enhancements and fixes, in various areas of the system, arising from automated reporting of system performance and user experience reports.

Work Order Management

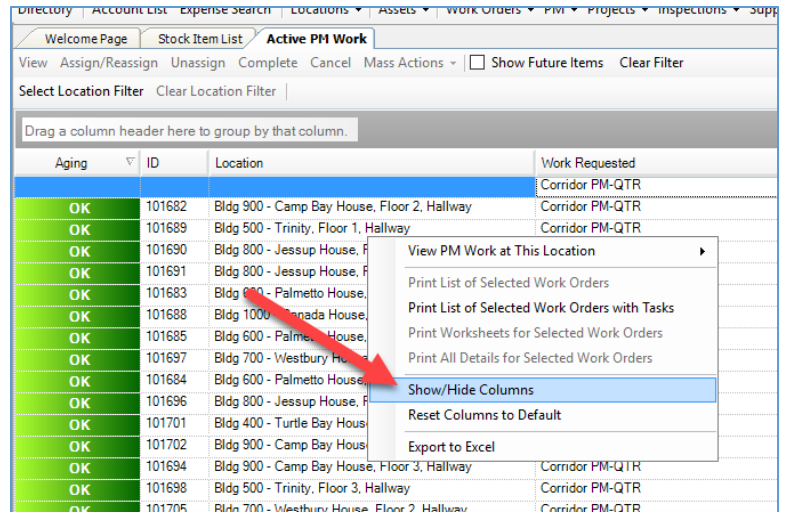

Mobile Workflow, Default Occupied Status

Users can create Standard and Inspection Work Orders from AsgardMobile. This process includes selection of the current unit status (e.g. Occupied, Unoccupied, Waiting). Previously, at Organizations with a custom Occupied Status list, the system would select an arbitrary corresponding status. To better control this behavior, we have added a configuration capability to pre-set which status will be chosen for Occupied, Unoccupied, and Waiting. This is an Organization-level setting.

Work Order Management Continued

PMs, Add Occupied Status to Active PM Screen

By customer request, we have added the Occupied Status field as a new column on the Active PMs screen. To update your columns, right-click in the grid, select Show/Hide Columns and check the box for Occupied Status.

The screenshot shows the 'Active PM Work' screen in a software application. The interface includes a navigation bar at the top with tabs for 'Welcome Page', 'Stock Item List', and 'Active PM Work'. Below the navigation bar are several action buttons: 'View', 'Assign/Reassign', 'Unassign', 'Complete', 'Cancel', 'Mass Actions', 'Show Future Items', and 'Clear Filter'. A 'Select Location Filter' section is also present. The main area contains a data grid with columns for 'Aging', 'ID', 'Location', and 'Work Requested'. The grid lists various work orders with their respective IDs and locations. A context menu is open over the grid, with 'Show/Hide Columns' highlighted. A red arrow points to this menu item.

Aging	ID	Location	Work Requested
OK	101682	Bldg 900 - Camp Bay House, Floor 2, Hallway	Corridor PM-QTR
OK	101689	Bldg 500 - Trinity, Floor 1, Hallway	Corridor PM-QTR
OK	101690	Bldg 800 - Jessup House, F	
OK	101691	Bldg 800 - Jessup House, F	
OK	101683	Bldg 600 - Palmetto House,

OK	101698	Bldg 500 - Trinity, Floor 3, Hallway	Corridor PM-QTR
OK	101705	Bldg 700 - Westbury House, Floor 2, Hallway	Corridor PM-QTR

Billings

This publish, we completed the creation of two new Billings utilities. They are precursors to the ability for our customers, who bill for work, to pull month end reports independently.

The first enhancement allows our customers to close their monthly Billing Periods themselves. The second enhancement addresses a common scenario in which a few Billings are missed and need to be added to the previous, closed Billing Period prior to report generation. Previously, customers using Billings required Katana's assistance to make these two changes.
