AsgardMobile

AsgardMobile 1.0

Updated All Platforms for Most Current Operating Systems

To ensure continued Operating System compatibility, we have updated both our Android and Apple applications. The fixes made address the following problems:

- Notification Sounds/Banners
- Intermittent errors that the app was developed for older versions (Android 10)
- Inability to create work orders (iOS 13)

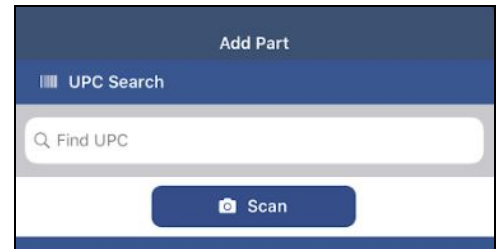

AsgardMobile 2.0

Styling Updates to Various Screens

We have worked on standardizing the styling of screens, including but not limited to the Dispatch Screen, Stock Room Selection Screen, and the Labor Category Screen.

UPC Scanning for Adding Stock to a Work Order

To streamline inventory selection when adding parts to a work order, we have added the ability to scan UPC codes to look up Inventory from both the Dispatcher Screen and My Work Order List.

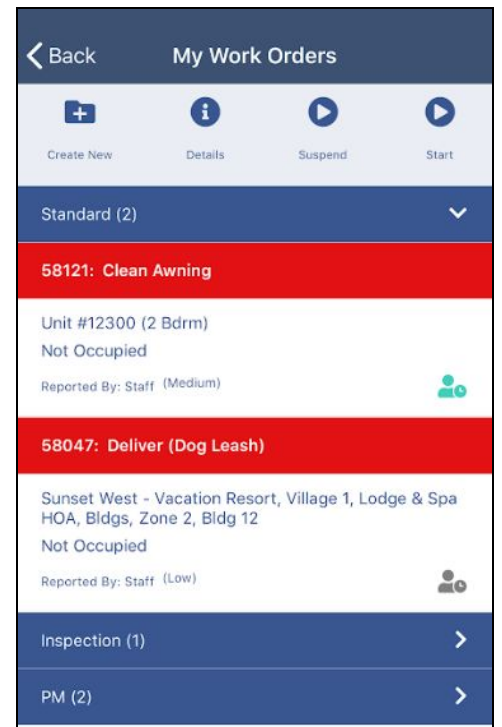

Testers Wanted!

We are looking for Manager users interested in early testing with the Beta version of AsgardMobile 2.0. Available functions include Search by Location, Dispatcher functions, and Work Order Create.

Please note: Localization/Translation has not yet been introduced to AsgardMobile 2.0. At this time, we are inviting English-speaking testers to participate. Localization/translation is on our roadmap to be completed soon!

The new app can be used in tandem with the existing app. If you are interested in participating, please contact support@katanasoft.com.

Desktop Application

Admin/Maintenance

Various Fixes/Changes

We made small enhancements and fixes, in various areas of the system, arising from user reports, automated reporting, and performance records/logs.

Some specific improvements you may notice include:

- Billing Search Screen Default Column Fix
- Optimization of FL Reserve Analysis Report
- Upgrades to User Directory Grids
- Fix to Actual Deletion on Account List, Budgeting Tab
- Reinstated Active Follow Up Summary Count

Cleans

Enhance Handling of Cleans Description during Import

When Importing Cleans, if a unique description is added to the import, it will appear before the template description for better visibility.

Purchase Order

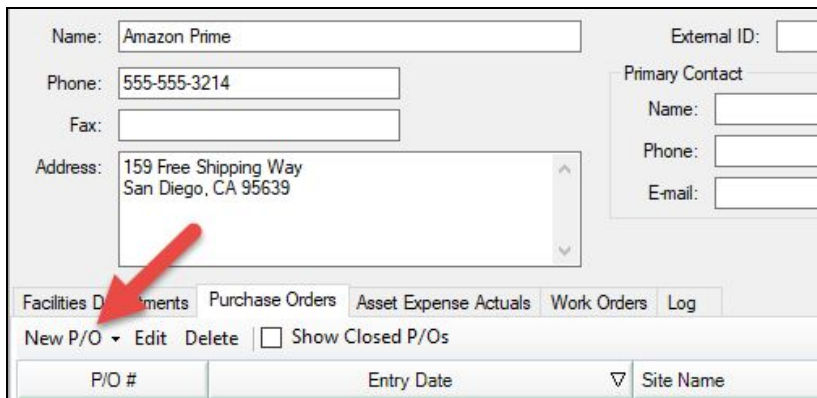

Maintenance/Upgrades

Correct issues with Locations

When creating a new Purchase Request (PO/RPR/OPR) from a consolidated site, the correct address will populate for the selected child site. Previously, the system was defaulting to the first site alphabetically.

Create Purchase Order from Vendor details screen

Users can now deploy the “New P/O” screen directly from a Vendor’s Detail Screen.

The screenshot displays a Vendor Details form. The form includes the following fields:

- Name: Amazon Prime
- Phone: 555-555-3214
- Fax: (empty)
- Address: 159 Free Shipping Way, San Diego, CA 95639
- External ID: (empty)
- Primary Contact: Name, Phone, E-mail (all empty)

At the bottom of the screen, there is a navigation bar with tabs for Facilities, Documents, Purchase Orders, Asset Expense Actuals, Work Orders, and Log. Below the tabs, there is a "New P/O" button with a dropdown arrow, followed by "Edit", "Delete", and a checkbox for "Show Closed P/Os". A red arrow points to the "New P/O" button.

Add Ability to Edit Remarks/Supporting Documentation During Approval Process

To support post-approval progress of Purchase Requests, users with appropriate permissions will now be able to add Remarks/Supporting Documents to a PO/OPR/RPR, even after it is approved. This will give users the ability to add any appropriate invoices or on-going communications as needed.

Lines	Competitive Bids	Related RPRs	Approvals	Receipts	Remarks/Supporting Documentation	Log
