AsgardMobile

AsgardMobile 1.0

Updated All Platforms for Most Current Operating Systems

To ensure continued Operating System compatibility, we have updated both our Android and Apple applications.

Current versions are:

2.1.40, available on iOS 12 or later

2.1.47, available on Android 7 or later

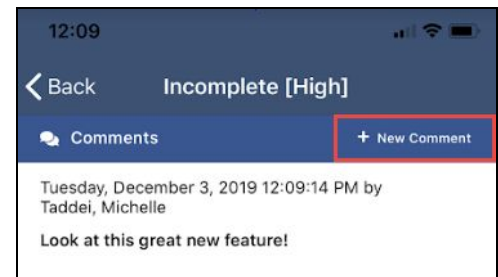

The fixes made address the following problems:

- Notification Sounds/Banners
- Intermittent errors that the app was developed for older versions (Android 10)
- Inability to create work orders (iOS 13)

AsgardMobile 2.0

Ability Add Text & Photo Comments

Users can now add both text and photo comments to a Work Order from the Dispatch, Location Search, and My Work Orders Screens.

Various Screen Styling/Usability Improvements

We have added visual queues to various screens for better user experience. For example, users will now see clear indicators that a screen is loading and better highlighting when selecting items, especially in Dark Mode for users on Apple Devices.

Expanded Ability to Start, Pause/Resume and Complete Work Orders

We have added the ability to Start, Pause/Resume, and Complete a work order from My Work Order Screen and Work Order Details (previously only available on the Dispatcher list).

Optimized Dispatch Screen when Limit by Department is flagged

We have enhanced the application to better support users whose view is limited by their department.

Testers Wanted!

We are looking for Manager users interested in early testing with the Beta version of AsgardMobile 2.0. Available functions include Search by Location, Dispatcher functions, and Work Order Create. Please note: Localization/Translation has not yet been introduced to AsgardMobile 2.0. At this time, we are inviting English-speaking testers to participate. Localization/translation is on our roadmap to be completed soon!

The new app can be used in tandem with the existing app. If you are interested in participating, please contact support@katanasoft.com.

Desktop Application

Admin/Maintenance

Various Fixes/Changes

We made small enhancements and fixes, in various areas of the system, arising from user reports, automated reporting, and performance records/logs. Some specific improvements you may notice include:

- Fix to Purchase Order Refresh
- Fix to Scenario Permissions - View only access

Reserve Management

Project Codes, Standardized Grid to include Green Filter Bar

We have upgraded the Project Code List to our advanced Grid and standardized to include the green filter bar for ease of use

Project Codes for Sunset Vacation Resorts				
New	Edit	Delete	<input type="checkbox"/> Show Inactive Codes	Close
	Code	Description	Inactive	
▼	SSW-015	Appliances	<input type="checkbox"/>	
▶	SSW-014	FF&E	<input type="checkbox"/>	

Financial Reporting

Expenditure Summary Report, Ability to Roll Up by Sub/Root Category

By request, we have added the ability to roll up the Expenditure Summary Report by both Subcategory and Root Category

Report Options

From FY: 2020

Years to Show: 30

Format: Detail

Root Category: Detail
Detail by Category
Detail by Root Category

Standard Work Order Creation

Work Order Import, Add Category to support Model Task Actions Taken

To support Category Specific Actions Taken, we have added Model Task Category as an optional field during Work Order Import. You will want to create a new import sheet the next time you attempt to import to ensure that you are using the latest template format.
