-----------------------------	---

AsgardMobile

Asgard Mobile 2.0

Inspections

Ability to Create-Start-Complete Inspections

Asgard Mobile 2.0 now fully captures the total Inspection workflow. Inspections can be opened from either the Dispatcher list or My Work Orders.

From the Inspections Detail screen, users can Start an Inspection, pass/fail tasks, add comments, and add any costs.

Ability to Create ad hoc Work Orders from an Inspection

We have added the ability to create Work Orders from within an Inspection. If a Work Order is created in this manner, the system will mark the original inspection ID in the comments for ease of tracking.

Usability Improvements

Formatting/Styling to Various Screens

We have made stylistic updates to various screens, including but not limited to:

- Enhanced refreshing of My Work Order list
- Default Reported By: Staff
- Comment Screen Formatting
- Work Order Details Formatting
- Enhanced Visibility of Task Summary Notes (i.e. sublocation)

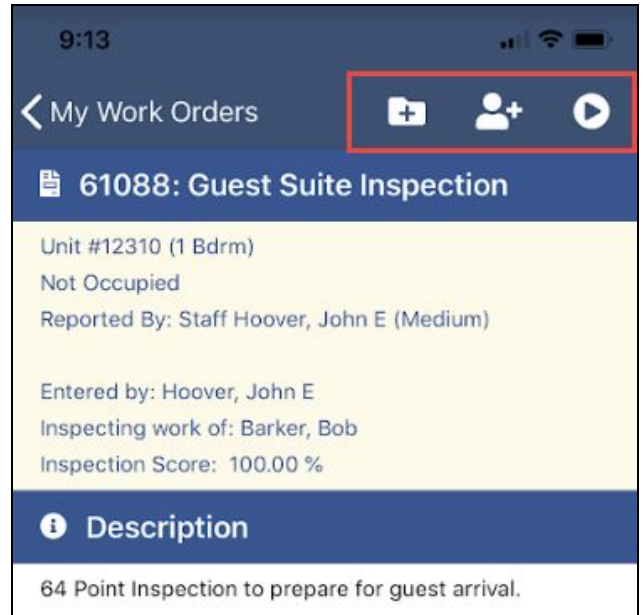

Connectivity Handling

One of the advantages of Mobile 2.0 is a more robust architecture to handle limited connectivity. This sprint we have also enhanced the messaging and on-screen indicators for situations in which connectivity (wifi and cellular) is completely unavailable.

Testers Wanted!

We are looking for Manager and Field-Level users interested in early testing with the Beta version of AsgardMobile 2.0. Available functions include Search by Location, Dispatcher functions, and Work Order Create, Edit, and Complete for Standard Work Orders and Inspections. The new app can be used in tandem with the existing app. If you are interested in participating, please contact support@katanasoft.com.

Desktop Application

Maintenance / Performance

Various Fixes/Changes

We made various enhancements and fixes, in several areas of the system, arising from user reports, automated reporting, and performance records/logs.

Performance Improvements

Optimized Active Inspection Screen Loading

By optimizing the Active Inspection Screen, users will now experience much quicker loading and refreshing of this screen.
