AsgardMobile v2.16.0 / Desktop Application v2.16.0

**KATANA**  
FACILITY MANAGEMENT

## Desktop Application

### Maintenance/Performance/Errors

We made various enhancements and fixes, in several areas of the system, arising from user reports, automated reporting, and performance records/logs.

### Feature Management

#### New Admin Capability - Prototype Feature Flag

We have enhanced our ability to control the roll-out of customer-specific features and/or new modules and functionality. Previously, this was controlled at the Organization Level, with an all-or-none level of access. We will now have the ability to control who has access to a new feature at the organization and user levels.

## Mobile Applications

### AsgardMobile 2.0

#### Maintenance/Performance/Errors

We made various enhancements and fixes, in several areas of the system, arising from user reports, automated reporting, and performance records/logs.

#### Support for International Support Calls

We have enhanced the in-app calling link (available from the Hamburger menu) to support the international phone number format.

#### Optimization for Small Screens

This update includes style and formatting improvements to dynamically display buttons and screens more effectively on small devices (e.g. iPod Touch)
