AsgardMobile 2.0 v2.18.0 / Desktop Application v2.18.0

Important Update - AsgardMobile 1.0

AsgardMobile 1.0 is no longer available in the Google Play Store or iOS App Store. Any users still on the legacy application will receive a "trying to establish a connection" message. When contacting Asgard Support, our Heroes will instruct users to transition to AsgardMobile 2.0 and will provide the below install links.

Android - Google Play Store	Apple - iOS App Store

Desktop Application

Maintenance/Performance/Errors

We made various enhancements and fixes, in several areas of the system, arising from user reports, automated reporting, and performance records/logs.

These changes include, but are not limited to:

- Fix to Inspections by Task Report Error
- Fix to Guest Incident, Duplicate Guest ID Error
- Transfer of Actual Interest on Scenarios
- Added Report Grouping & Description as part of Asset Import for Reloads
- Capture Report Grouping on Scenario Recurring Series

Assets & Reserves

Added Description Field to Accounts

By customer request, we have added a new field to Accounts to allow a user to track specific Account Details such as property size and phasing break down. This new field will be included in a new report, also available this publish, that will allow users to easily share these details with boards and other departments.

New Detail Reports, Assessment & Account Details

By customer request, we have added two new Reserve Reports that allow a user to easily share both Account Details and Assessment Details on a single Account.

Simplified Cash Flow Report Excel Formatting

As part of a larger initiative, we have simplified the Excel formatting of the Cash Flow Report. We have reduced the number of merged cells to allow for easier user utilization. We will continue working through our most popular reports in future publishes.
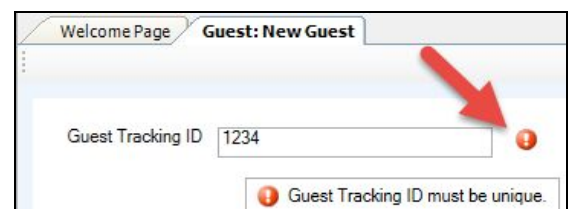

Purchase Approvals

Expiration of Email Tokens

To limit the number of circulating active Approval emails, we have implemented an expiration for Purchase Orders, RPRs, and OPRs emails. Users will be directed to research Approval details within the desktop application after 60 days of Approval or Denial. Details are indefinitely preserved in Asgard for historical tracking.

Guest Incident Tracking

Warning for Duplicate Guest Tracking ID

We have added a warning for Guest Tracking IDs that already exist. If you encounter this warning, please review existing Guests under the Guest List in Asgard.

Maintenance/Performance/Errors

We made various enhancements and fixes, in several areas of the system, arising from user reports, automated reporting, and performance records/logs. These changes include, but are not limited to:

- Continued Localization/Translations
- Standardize Assign Option Pop Up on Inspection Create
- Styling Complete Screens
- Standardizing Fonts
- Added Suspend Icon to Work Order header
- Moved Location Search "Edit" Icon

Added Direct Link to Training Material on ALP Site

For easy, in field access, we have added a link that will take users directly to all available AsgardMobile 2.0 training materials posted on the Asgard Learning Portal.

Auto-Populate Labor Based on Start Time

By customer request, we have added a convenience feature that will auto-populate labor time based on the work order start time. Users will still be able to manually adjust this time as needed.
